The Foundations of Social Work Practice

A Graduate Text

Carol H. Meyer and Mark A. Mattaini, Editors

The Foundations of Social Work Practice is an outstanding new text written to meet the requirements for a graduate foundation course. The book offers core, essential, comprehensive knowledge that will provide a base for graduate social work students and prepare them for future courses and experiences.

This text promotes skills development by using multiple theoretical frameworks to illustrate different ways content can be taught and learned. It draws from an essential base, yet equips graduate students to think through conflicts within social work frameworks. Human behavior and the social environment, social policy, social welfare history, research and evaluation and fieldwork are all addressed.
